Dear Resident

Household waste survey in Gloucestershire

Your waste has been collected today by research consultants Resource Futures on behalf of Gloucestershire County Council who are undertaking a survey of Gloucestershire's household waste.

Your household and others in the area have been chosen at random to represent a sample of typical households in Gloucestershire.

All of the waste collected will be handled confidentially and no information will be linked in any way with waste from your individual property. All the samples collected will be analysed in bulk to find out what quantities and types of materials are present.

After sorting and weighing all refuse will be sent for recycling or disposal as usual.

I would be grateful if you would participate in this important survey. However, if you are at all unhappy about your waste being collected, Resource Futures have been instructed to leave it behind for collection by the usual council waste crews.

Those working on this study have been issued with personal identity cards with their photos by Resource Futures, which they will be happy to show to you upon request.

If you have any questions about this study, please contact myself on the number above. You can also confirm arrangements made for this study by contacting the County Council Customer Services team on 01452 425000.

Thank you for your cooperation.

Yours faithfully

Andy Pritchard

Waste Projects Manager
