COMMUNITY WINTER ACTION PLAN

January 2023

(1) Background

Following severe winter weather, access to key community facilities can be greatly reduced by the snow and ice on roads and footways within the Parish. During periods of severe weather, many residents can be prevented from leaving their homes to access local facilities which affects the quality of life of many residents and also affects businesses providing services within the Parish.

The Parish Council and local community accept that Gloucestershire County Council do not have resources available to deliver the level of service requested and therefore accept that provision of a higher level of service will require self help and community interaction.

(2) Principles

The Parish Council have some labour resources which they may be able to offer in order to provide assistance during times of adverse weather, e.g. clearing snow from footways, gritting footways or refilling grit bins. During these adverse weather situations Gloucestershire County Council's resources are focused on keeping the strategic carriageway network running and so this assistance is warmly welcomed.

(3) Scheduling

During times of severe weather, such as snow, heavy icing or freezing rain, the Parish Council and Gloucestershire County Council will liaise with each other about how best the organisations can assist each other in supporting the community whilst maintaining key operational duties. The extent and duration of this assistance will vary depending on the availability of resources and the severity of the situation but will be agreed between the organisations as required.

(4) Contacts

Parish Council contact details – clerk@northleach.gov.uk or 01451 861499
Gloucestershire County Council – 08000 514514

(5) Equipment/Materials

Gloucestershire County Council has provided a hand spreader to the Parish Council to assist in spreading salt on footway area. Gloucestershire County Council will provide a stock of bagged salt to the Parish Council prior to the start of the winter season (end October). This stock is available to the Parish to manage and distribute as they deem appropriate for use on the public highway. Whilst Gloucestershire County Council will endeavour to replenish this supply during the winter season if necessary, it should be noted that re-supply cannot be guaranteed as the County's efforts need to be directed to maintaining the strategic route network and/or conserving supplies of salt.

(6) Health & Safety

A risk assessment which seeks to cover the risks and control measures associated with these activities is attached.

HAZARD IDENTIFICATION AND RISK ASSESSMENT									
Ref	Hazard	P	S	R	Response/Control Measure	P	S	R	*Output
	Exposure to the elements – severe cold or hypothermia	2	3	6	Adequate PPE including warm clothing to be worn. Fully charged mobile phone to be carried. Lone working control measures in place. CTC managers to check operatives out and in, and at regular intervals during severe weather conditions	1	2	2	
	Lone working – risk of injury, risk of attack by member of public	3	3	9	Person to ensure that someone knows of his or her location and approximate time of return. Person is fit to lone work. Work activity/area must be safe to be undertaken by one person. Lone worker is provided with means of communication to summon assistance in an emergency.	2	3	6	
	Maintenance of winter maintenance equipment – risk of malfunction of equipment	3	2	6	All equipment used for winter maintenance to be subject to regular maintenance. Prior to leaving depot, operator to undertake visual check of all functions associated with equipment.	2	2	4	
	Slips, trips and falls – during snow clearance, gritting footways or filling grit bins – injury to operative or other members of the public	3	3	9	Operative awareness. Appropriate footwear to be worn by operative carrying out work. Awareness of volume and location of pedestrian activity and extent of footway areas being occupied.	1	3	3	
	Manual handling – risk of injury during movement of equipment or materials	3	3	9	Operative awareness. Person is fit to undertake activities; work activity/area must be safe to be undertaken by one person or should be adjusted accordingly. Appropriate equipment should be used for moving or handling materials.	1	3	3	
	Traffic – risk of injury from passing traffic whilst carrying out activities	2	4	8	Operative awareness. Activities to be limited to pedestrian areas only.	1	4	4
