

## Northleach Cemetery - Memorial Safety August 2025

A memorial safety inspection has recently been completed in this cemetery. The exceptionally dry summer caused ground shrinkage, which has affected the stability of some memorials. A full list of memorials affected is given below. Memorials requiring attention have also been marked with a notice. Note: Where memorials have failed, they may have been laid flat for safety.

Memorials belong to the rights holder of the grave. We would like to contact the owners so they can arrange to repair the memorials, but unfortunately the addresses we hold are out of date. You are invited to review the list below and get in touch with us if you are responsible for, or have a connection to, a memorial on the list.
